# On the Subject of Sugar Skulls

Success doesn't come for free. You have to do whatever it takes to seize your moment.

- Three skulls will be displayed, forming a line of 3 in the table below, horizontally, vertically, or diagonally. Identify which skull is in the middle cell.
- Take which position in its cell this skull has (left, right, or middle). Then modify this position based on the color of its display's frame:

  - **Red:** Stay in place.
  - **Orange:** Move one step left.
  - **Purple:** Move one step right.

- Select the skull whose position in its cell is this new position to disarm the module.
